

PROJECT OVERVIEW & STRATEGY ENGINE

Target Platform: Google NotebookLM & Promoters

Date: July 6, 2026

Author: Lux Automaton AI Engine

Version: 1.2 (Launch-Ready)

1. Executive Summary

GTA Money Team is a premium interactive strategy portal tailored to players, content creators, and server administrators preparing for Grand Theft Auto VI. Built on a hybrid desktop OS interface (inspired by Lana Vice OS), the platform offers custom profit calculators, route planners, staff management tools, and pre-configured server blueprints designed to capture market share upon the game's release. The core philosophy centers entirely around **legal wealth strategy**—excluding hacks, mod menus, or TOS-breaking exploits, focusing instead on optimization templates, affiliate conversion stacks, and monetization models.

Core Value Propositions:

- **For Players:** Real-time hourly yield estimators, transport route optimization tools, and story speedrun pathways.
- **For Server Operators:** Production-ready GTA VI configuration blocks (server.cfg, client/server script loops) and fully set up Discord RP recruitment layouts.
- **For Content Creators:** Video hook blueprints, YouTube/TikTok script blueprints, and customizable landing page templates to launch digital businesses.

2. Technical Architecture & Hybrid Navigation

The web application leverages a hybrid architecture combining a high-impact, single-page cinematic scrolling landing page with a fast, decoupled routing system. This ensures that strategy tools render inside clean, standalone desktop modules.

Layer	Tech / Frameworks	Description
Client Presentation	React, Vite, GSAP, CSS Grid	Custom desktop frames, CRT screen glows, and fluid scroll-mask animations.
Animations	ScrollTrigger, Custom Math	GSAP-driven viewport scaling and mask coordinates.
State Management	Local Storage API	Holds user leads, active checkout orders, and VIP membership profiles.
Assets Routing	Vite Static Bundling	Organizes the server templates, video scrubs, and custom backgrounds.

3. Strategy & Server Templates Catalog

The system database includes 21 digital products ready to be sold through the template vault checkout. These playbooks are fully configured for Stripe/PayPal payment links.

Vault Highlights (21 Total Guides):

- **Launch-Week Passive Capital Speedrun:** Story milestones, fast vehicle purchases, and early property acquisitions.
- **Solo Courier Operations Plan:** High-efficiency delivery path charts bypassing choke points.
- **GTA VI Server Template (Xenon key: BeCBNxJcJaRv):** A pre-made Discord RP community blueprint featuring moderator rules, role divisions, and interview setups.
- **Crew Payout Splits Guide:** Payout split configurations (50% to 75%) based on crew rank and logistics contributions.
- **Take-Two stock catalyst tracking:** Strategic sheet for tracking Take-Two Interactive (TTWO) financial milestones.

4. GTA VI Starter Server Template Specification

We have shipped a complete FiveM / GTA VI compatible starter server configuration package, featuring essential configuration scripts, client/server connections, and player handlers.

Key Script Files & Architecture:

1. **server.cfg** - Core server parameters:

- Defines database connections, slot counts, default game resources, and admin permissions keys.

2. **fxmanifest.lua** - Resource meta definitions:

- Outlines runtime parameters and links client/server files.

3. **player.lua (Server-side)** - Connection and database initializations:

- Handles secure player authentication and retrieves stats upon connection.

4. **spawn.lua (Client-side)** - Character coordinate routing:

- Sets default coordinates for player spawning and guides teleports.

5. Cinematic Marketing Video Script (GTA VI Styling)

This script is designed for generating a highly engaging short promo video (90 seconds) matching the visual assets, backgrounds, and synth-pop aesthetics of the GTA Money Team portal.

Visual Scene	Voiceover (Lana - AI Coach)	Audio / SFX
0:00 - 0:15: Yacht Marina Sunset Lana leans against the marina railing holding her tablet. A helicopter circles overhead in pink sunset skies.	"Leonida. City of lights, speed, and endless cash. But it's all slowing down, and you're just paying for it."	Soft synth pads, distant sirens, helicopter rotor sounds.
0:15 - 0:35: Penthouse Office Cut to Lana in a neon command center. High-tech screens display charts and maps. Gold decorations glow.	"Welcome to the command deck. GTA Money Team is your backstage pass to the city's secrets. Let's start with the data."	Fast-paced synth beats, digital interface sounds, subtle gold chime.
0:35 - 0:50: Sunset Beach Street Lana walks confidently down the boardwalk next to a classic muscle car.	"We've laid out the launch-week speedrun routes and 20 detailed business strategies. Stocking up on the essentials is key."	Relaxed synth melody, car engine sounds, boardwalk chatter.
0:50 - 1:10: Night Wet Street Lana leans on a sleek teal supercar in front of the neon lights of the Colony Hotel.	"Need a home base? Get our production-ready server room for rent. It's the perfect spot for your empire."	Heavy bass synth, neon sign sounds, rain on pavement.
1:10 - 1:30: Outro / Call to Action Lana stands on a rooftop lounge looking out at the city skyline as neon logos fade in.	"Stop guessing. Start executing. Log in to the GTA Money Team portal today and claim your share of the city."	Uplifting synth anthem, city skyline SFX, portal logo sounds.
